

WAPPP

[Mobilizing Blended Finance for PPPs]

2025 theme for the World Association of PPP Units and Professionals (WAPPP)

Main Goal and Objectives

Main Goal

To promote the adoption and understanding of blended finance as an important approach to deliver PPPs.

Objectives

Promote understanding and awareness of blended finance among stakeholders;

Facilitate knowledge sharing by exchanging case studies and worldwide experiences about blended finance in PPPs;

Build capacity of stakeholders to structure and implement blended finance projects;

Encourage collaboration and foster partnerships among stakeholders

WAPPP's Initiative on Blended finance for PPP

Blended Finance refers to the deployment of concessional capital (public and philanthropic) alongside commercial capital countries and enhance the financial viability of projects that deliver public infrastructure and services.

WAPPP believes that blended finance can be an important tool to help mobilize private investment for environmentally- and socially-responsible PPP projects in developing countries and is dedicating its efforts in 2025 to explore how blended finance can be utilized more effectively and efficiently in PPPs.
